If you enable it you can set the limit you would want.[b]Note:[\b] and mega[b]bytes[\b] a second, while most Internet connections are rated in [b]bits[\b] per second.[\olist][h4]In-game Rate[\h4]Most connections work well with the default [i]rate[Vi], [i]cl_updaterate[Vi], and [i]cl_cmdrate[Vi] settings. Most servers prevent changing your in-game rate settings.[b]Default Settings vary between games, but the following is a safe baseline for most broadband connections:[\b][list] [*][code]cl_updaterate 20[\/code][*] [*][code]cl_updaterate 20[\/code][*] [*][code]cl_cmdrate 30[\/code][*] [*][code]cl_updaterate 30[\/code][*] [*][code]cl_updatera [h4]Test Script[\/h4]You may try this test rate settings script to see what different settings do, but the default settings are the best for most internet connection types.[b]Instructions[\/b]Download this rate.cfg file and put it in your game folder, then add the line [code]exec rate.cfg[\/code] to your userconfig.cfg file:[h4]rate.cfg[\/h4] [url=\/downloads\/4166-TYSC-9690\/rate.cfg]Download rate.cfg[\/url]56K modems are usually best set to a rate between 3500 to 5000 - you may need to edit some of the rate settings to find the best range for performance.Once you have loaded the rate.cfg test script you can execute the following commands in the developer's console to determine which rate offers the best performance:[list] [*][code]rates[\/code] - see all the current settings[*] [*][code]dslow[\/code][*] [*][code]slow[\/code][*] [*][code]slow[\/code][\[code]slow[\[code][\[code]slow[\[cod LAN and high-speed connections only[\/*] [\/list]You may also use the F2 key to cycle around to all the settings.", "title": "Setting Client Rates", "timestamp": 1627933653, "author_account_id":null}} > At-least A hope You know the problem with these file hosters is that they speed cap the free users which isn't good. But when you sign up for a paid account with uploaded or rapidgator host then you have access to high speed downloads. Apart from the download limit all the other restrictions such as file download limit per hour will also be removed. Some users who are heavy downloaders would prefer to buy the premium account from these hosts but someone like you and me would consider free options. So the thing is that their are many online web applications or simply said websites that can bypass the speed limit from uploaded or rapidgator. I have found the one that I have found the one of them I have found the one that I have found the one of them I have found the one that I have found the one of them I have found the one of them I have found the one that I have found the one of them I have found the one of the sign up for a free account with this website and bypass speed limit from uploaded files. Not only that you will also get to use the seedbox feature of this app which is very useful if you are only looking to download files. Not only that you will also get to use the seedbox feature of this app. then this is the best option. However if you wish to download files from rapidgator, hitfile or any other file host then you might need to consider the paid options (which is really cheap BTW). Also, You can inspect element and bypass the premium download for some websites but that doesn't works for all the websites because of their security levels, they don't make the download button hidden, in many cases they redirect you to a new page that is totally different. Apart form speed you donwload, you even asked for number of download, you will find apps for all platforms (Android, iOs and pc) and even chrome extension which can create one for you. So, your IP changes and your no more limited to download only once 48 hrs or a finite no. Of files or whatever the terms. Fair Use policy You do agree with the fact that registered users and users with no account have the ability to download files at speeds not exceeding 300 kilobits per second, no more than 2 files per day and no more than 2 files per hour. The maximum size of downloadable files for registered users and users with no account is 300 MB. The interval between sessions of the download must be at least 15 minutes. Premium users accounts have limitations depending on subscription package, maximum size of files uploaded to the service are 2 GB for regular users and 5 GB for files. 5 GB. You agree that the maximum size of files uploaded to the service are 2 GB for regular users and 5 GB for files. uploading files using the ftp protocol.
